

Our BlackBox GPS 16C Locator™¹ is a highly advanced monitoring system using leading GSM/GPRS wireless communication, extra sensitive GPS and the ability to add multiple peripherals to customize your tracking needs. It uses sophisticated GPS Satellite and cellular network technology to transmit your vehicle's position through a data network.

AVAILABLE WITH VERSION 2011.4!

BlackBox GPS Fleet Manager Elite™ is a web-based tracking and routing solution ideal for the serious fleet manager who needs to monitor a multitude of engine functions, driver behavior, fuel efficiency and labor productivity. In addition to the many standard features, The Elite Solution allows you to choose reporting for up to five hardware add-ons, providing you with expanded ability to customize features needed to meet your business demands. Call us today for a free quote based on your fleet management and GPS tracking needs.
